Abstract of JP11126367

PROBLEM TO BE SOLVED: To enable specifying plural musical orders by recording plural kinds of reproduction order specifying information of an optical information recording medium in which information of plural musical pieces or videos or the like and reproduction order specifying information specifying the reproduction order of musical piece information are recorded. **SOLUTION:** A CPU 308 stores read index information by controlling a servo circuit 3 in order to make a pickup 302 read out index information including the reproduction order specifying information recorded in a TOC area being in the inside of a read-in area. A RAM 311 stores data of the mode 1, the mode (n) and the mode (m) of Q channel codes being in among the reproduction order specifying information in separate areas. Musical orders corresponding to respective modes of the Q channel codes of the reproduction order specifying information read out from the TOC area of an optical information recording medium 301 are made to be displayed on a display panel 309. Then, information of musical pieces are reproduced by specifying the pattern of a prescribed musical order with the program selecting button of an operation part 310.
